Profile

Computer Science and Software Engineering student with a passion for backend development. Strong Python and Linux skills. Always eager to adapt and take on new challenges.

Projects

Memorization Tool ⧉
An e-flashcard app written in Python using the sqlite database to store flashcards. It implementations the Leitner's system which suggests reviewing cards at increased intervals. Flashcards are stored in three different boxes, each marked with a time period that show how frequently the cards should be reviewed.
